TRANSACTIONS OF THE AMERICAN MATHEMATICAL SOCIETY

CONTENTS

Vol. 336, No. 1 Whole No. 694 March 1993

Detecting algebraic (in)dependence of explicitly presented functions (some applications of Nevanlinna theory to mathematical logic)
By R. H. GUREVIČ 1
Volumes of vector fields on spheres
By SHARON L. PEDERSEN 69
Reye constructions for nodal Enriques surfaces
By A. CONTE AND A. VERRA 79
Nonstandard topology on function spaces with applications to hyperspaces
By HERMANN RENDER 101
Algebraic shift equivalence and primitive matrices
By MIKE BOYLE and DAVID HANDELMAN 121
Zero-equivalence in function fields defined by algebraic differential equations
By JOHN SHACKELL 151
Geometry of weight diagrams for $U(n)$
By ENG-CHYE TAN 173
Countable closed LFC-groups with p-torsion
By FELIX LEINEN 193
Conformal metrics with prescribed Gaussian curvature on S^2
By KUO-SHUNG CHENG and JOEL A. SMOLLER 219
GL(4, R)-Whittaker functions and ${}_4F_3(1)$ hypergeometric series
By ERIC STADE 253
On Klein's combination theorem. IV
By BERNARD MASKIT 265
Artinian subrings of a commutative ring
By ROBERT GILMER and WILLIAM HEINZER 295
Decidable discriminator varieties from unary classes
By ROSS WILLARD 311
Self-similar measures and their Fourier transforms. II
By ROBERT S. STRICHARTZ 335
Rational approximations to the dilogarithm
By MASAYOSHI HATA 363
An extension theorem for closing maps of shifts of finite type
By JONATHAN ASHLEY 389
Hyperbolic structures for surfaces of infinite type
By ARA BASMAJIAN 421
Witt's extension theorem for mod four valued quadratic forms
By JAY A. WOOD 445

Vol. 336, No. 2 Whole No. 695 April 1993

A selection theorem for topological convex structures
By M. van de Vel 463
Attracting and repelling point pairs for vector fields on manifolds. I
By Gabriele Meyer 497
The product of two normal initially κ-compact spaces
By Eric K. van Douwen 509
Semilinear evolution equations in Banach spaces with application to parabolic partial differential equations
By Samuel M. Rankin III 523
Higher order commutators for vector-valued Calderón-Zygmund operators
By Carlos Segovia and José L. Torrea 537
Cohen-Macaulayness of semi-invariants for tori
By Michel Van den Bergh 557
Failure of cancellation for direct sums of line bundles
By Richard G. Swan 581
The value semigroups of prime divisors of the second kind in 2-dimensional regular local rings
By Sunsook Noh 607
Mountain impasse theorem and spectrum of semilinear elliptic problems
By Kyril Tintarev 621
On a conjecture of Lin-Ni for a semilinear Neumann problem
By Adimurthi and S. L. Yadava 631
A unique continuation property on the boundary for solutions of elliptic equations
By Zhiren Jin 639
An indirect method in the calculus of variations
By F. H. Clarke 655
Toeplitz operators and weighted Wiener-Hopf operators, pseudoconvex Reinhardt and tube domains
By Norberto Salinas 675
Weak solutions of the porous medium equation in a cylinder
By Björn E. J. Dahlberg and Carlos E. Kenig 701
Weak solutions of the porous medium equation
By Björn E. J. Dahlberg and Carlos E. Kenig 711
Uniqueness in bounded moment problems
By Hans G. Kellerer 727
Branched surfaces and attractors. I: Dynamic branched surfaces
By Joe Christy 759
On injectivity in locally presentable categories
By Jiří Adámek and Jiří Rosický 785

Supercuspidal representations and the theta correspondence. II: SL(2) and the anisotropic O(3)
By David Manderscheid 805
On Lagrange interpolation at disturbed roots of unity
By Charles K. Chui, Xie-Chang Shen and Lefan Zhong 817
Remarks on prescribing Gauss curvature
By Xingwang Xu and Paul C. Yang 831
$W^{2,p}$-solvability of the Dirichlet problem for nondivergence elliptic equations with VMO coefficients
By Filippo Chiarenza, Michele Frasca and Placido Longo ... 841
Unlinking via simultaneous crossing changes
By Martin Scharlemann 855
Weighted norm inequalities for homogeneous singular integrals
By Javier Duoandikoetxea 869
Functional equations satisfied by intertwining operators of reductive groups
By Chen-bo Zhu 881
Groups of dualities
By Georgi D. Dimov and Walter Tholen 901
Small solutions to inhomogeneous linear equations over number fields
By Robbin O'Leary and Jeffrey D. Vaaler 915
Algebraic cycles and the Hodge structure of a Kuga fiber variety
By B. Brent Gordon 933
